

## **Proposal for Leadership Challenges and Classroom Management for Faculties.**

Effective classroom management is much more than just administering corrective measures when a student misbehaves; it's about developing proactive ways to prevent problems from occurring in the first place while creating a positive learning environment.

Establishing that climate for learning is one of the most challenging aspects of teaching, and one of the most difficult skills to master. For those new to the profession, failure to set the right tone will greatly hinder your effectiveness as a teacher. Indeed, even experienced faculty may sometimes feel frustrated by classroom management issues. Strategies that worked for years suddenly become ineffective in the face of some of the challenges today's students bring with them to the classroom.

### **The Teachers are Real Leaders – The real leaders will create many leaders**

The Teachers and Professors are playing critical leadership roles while contributing to students.

The Teacher Leader requires the following qualities to manage the classroom.

- Taking initiative
- Persevering in the face of obstacles
- Building support with parents and community
- Building a team spirit among the faculties and students
- Providing support and encouragement for other teachers
- Facilitating communication and reflection among the faculties and students
- Using alternative strategies to build skills and confident
- Exercising patience
- Building trust and developing rapport
- Managing and balancing the Emotions
